A FEW NOTES...

This is a supplement to the original book and can either be viewed on-screen and/or printed.

SUGGESTIONS:

If viewing on-screen, it is recommended that you zoom-in on the longer titles (e.g. “The Metropolitan Museum of Art” that have more complicated designs), to see the **bold-lined** typography easier.

If printing, it is recommended that you set the printing preferences to print double-sided, print pages 3-46 (44 pages on 22 sheets of paper), and to flip page on the long edge. This is a completely black-and-white document and may be printed with black ink only.

A FEW RULES...

1. Typography consists of letters, numbers, and special characters (e.g. an apostrophe).
2. All typography has its own lines (no two share), and all lines are used; however, they can converge momentarily.
3. Typography can either be UPPER or lower case, single-lined, double-lined (bold), or both.
4. A typography's position can be upside-down, reversed, or rotated.
5. Typography can go off the edge of the frame.

Now, go have fun and find the typography with the keys!

If you have any questions about the keys or how it all works, feel free to contact Darin on his artsite: www.darinjones.com

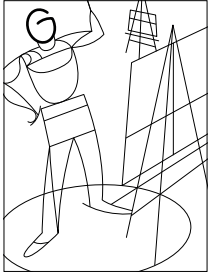

With love,

Darin
